REQUIRED EXPERIENCE

- Strong written and verbal communication skills
- Exceptional organization skills and attention to detail is a must
- Three years minimum developing web and/or software solutions
- Familiarity with Agile Software Development
- Desire to learn new frameworks and technologies

ABOUT YOU

You have strong communication and technical skills, and take pride in finding the right solution for the project. You have an understanding of best practices as well as evolving technologies, and how they may apply to a client's requirements. You are organized and efficient, managing your time wisely as you tackle multiple projects simultaneously. You want to work for a growing company that has frequent potluck lunches, free parking, and windows that open.
