
Web Support Team Member

Sandbox Software Solutions, located steps from the University of Guelph, is seeking a Web Developer for its Guelph office. Ideally you have a College diploma or Bachelor's Degree, and 2+ years of experience in web development and client communications. Familiarity with PHP and open source CMS is an asset.

THE JOB, DECODED

- Work with clients to gain an understanding of their issue
- Respond to client requests in a timely fashion
- Write cascading style sheets (CSS), HTML and JavaScript to support the implementation of websites
- Crop and optimize images for use in websites
- Apply SEO techniques to websites
- Build interactive web components using tools like JavaScript
- Ensure websites and web-based systems meet the requirements and quality standards set for the project (W3C and AODA)
- Ensure web solutions perform consistently across web browsers
- Carry out website and web application maintenance
- Assist lead IT staff with managing server and website environments

ABOUT YOU

You have strong communication and technical skills, a keen eye and great attention to detail. You are organized and efficient, managing your time wisely as you tackle multiple projects simultaneously. You want to work for a growing company that has frequent potluck lunches, free parking, and windows that open.
